

GREEN NAC

Scale Control Water Treatment System

The Alternative to Water Softening

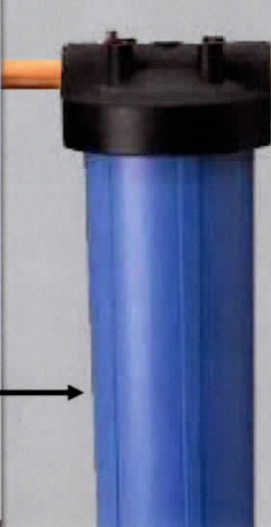

Produced by
ULTIMA
Water Products

• **SEDIMENT FILTER**

(Optional)

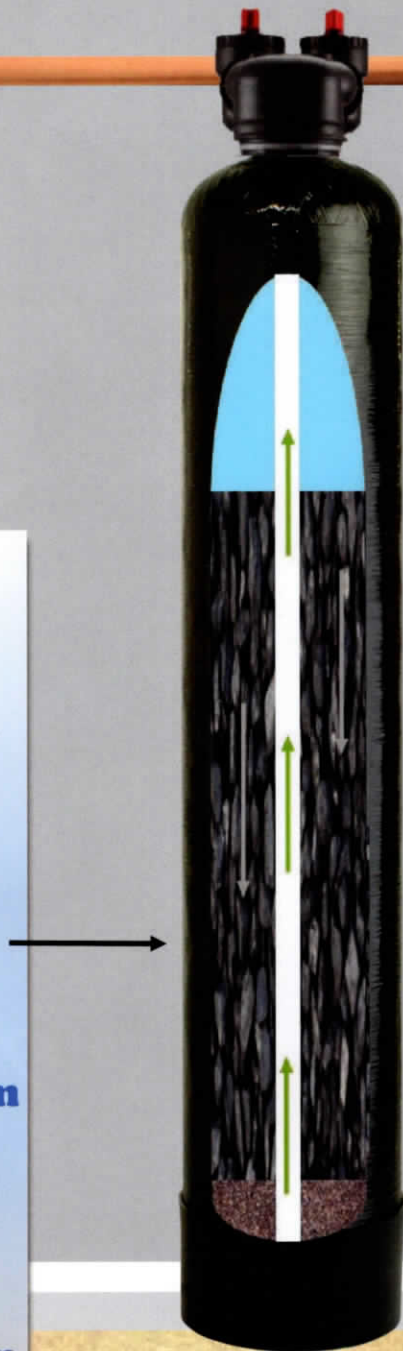

The Sediment Filter acts as a net that catches unwanted dirt and particles that flow through your home.

- Filters down to **5 Microns** (the size of a red blood cell)
- Filter must be changed at least yearly

• **Coconut Shell Carbon**

- removes or reduces Chlorine, Herbicides, Pesticides, Cleaning by-products, and Tri halo Methane.
- Coconut Shell Carbon is one of the most porous substances on earth and is perfect for commercial and residential water treatment.
- Removes unpleasant tastes and odors from your water
- Clean Filtered water at every faucet in your home.
- Operates with **NO backwash or electricity**

Sediment Filter

<u>Part Number</u>	<u>Description</u>
ULT20BB1-SED	20" BB Sediment Filter, Housing, Bracket

- **UV Light** (Optional)

- Sterilizes your water without the use of chemicals. Killing bacteria and microorganisms

- (E. Coli, Cysts, Viruses, Cryptosporidium, ETC)

- **NAC Filtersorb Media**

- Environmentally friendly alternative to a water softener.
- Reduces Scale without using salt or wasting water.
- Operates without electricity for reduced energy consumption.
- Long lasting media makes it virtually maintenance free.
- Helps remove existing scale
- Scientifically tested and certified

UV Light

Description

VH200

3/4 or 1", 9 gpm

VH410

3/4 or 1", 18 gpm

GREEN NAC

Why Do I Need Green NAC?

- Over 80% of the United States has hard water resulting in Scale deposits on **Plumbing Fixtures, Pipes, and appliances.**
- This can result in a long list of negative effects that can cost lots of \$\$\$, including expensive repairs to appliances, and stains in sinks and bathtubs.
- Most municipal tap water supplies contain **high levels of chlorine** to keep the water safe to drink.
- But Chlorine itself has many negative effects such as **bad tastes and smells** along with potential negative effects on your health.

How it Works

- N.A.C.— Nucleation Assisted Crystallization
- NAC transforms dissolved hardness into harmless microscopic crystal particles.
- The crystals move through the plumbing system without latching onto pipes and fixtures.
- More importantly the crystals are formed without the use of salt, a drain, or power.

Made in USA
