

# Alkalizer

Innovative Reverse Osmosis

***Complete  
Water Purification***

***pH 7.5 to 9.5***

***Super Efficient  
Reverse Osmosis***

## Steps of Purification

### Pre-Filter

- Dirt and turbidity are removed.
- Chlorine, taste and odors are removed.
- Most VOC's or the alphabet soup on the news are removed.

### Membrane

- Most unwanted inorganics are removed at about 98%.
- Most heavy metals.
- Dissolved solids too small to be removed by the pre-filter are removed and sent to drain.
- Our membrane delivers really great water.

### Post-Filter

- Pure water stored in the storage tank is now polished when you call for water at the faucet.
- Virtually anything left in the water is removed by the post-filter.
- This is where the pH is raised to the 7.5-9.5 range.

### Rapid Recovery

- Pure water is produced as you use it. This rapid recovery assures that you can have all the pure water your house can use. Some of these uses may be:
- Drinking Water
- Pure Ice Cubes
- Baby Formulas
- Auto Batteries
- Cooking Water
- Juices, Coffee, Tea
- Soups and Sauces
- Weight Loss Diets
- Low Sodium Diet
- Pets
- Plants
- Humidifiers
- Aquariums
- Steam Irons
- Fruits
- Vegetables

## We Have Your Faucet

### 905 Series Faucets

### 888 Series Faucets

## Alkalizer Reverse Osmosis System

With the Alkalizer Reverse Osmosis system you get the same high-quality water and it is alkaline water. This is a completely new technology offered on Ultima Systems. This system is designed to give you high-quality water and a worry-free purified water for drinking and cooking. The system is available with a 24, 36 and 50 gallon per day production option. This high quality system will provide outstanding water from private wells or municipal supplies.

### Activated Carbon

Gives water the final polish for great taste.

### KDF 55

Offers extra protection against bacteria and viruses

### Calcite

Bring RO water pH back to equilibrium

### Mineral Blend

Gives you the healthy minerals back the RO removes with special blend

## Stages of Filtration

1. Pre Sediment Filter: traps sediment including rust and dust.
2. Pre-Carbon Filter: removes chlorine and other chemicals
3. 50 GPD Membrane: standard and High efficiency membranes both available. Removes most chemicals, microorganisms, sediment and salinity
4. Calcite Filter: water drips through the filter after it is produced by the membrane for maximum mineral adsorption
5. Alkalizer: the final filter before water travels to the faucet

**Clear Ice Cubes**

**No-More Bottles**

- **Convenient**
- **Safe & Healthy**
- **Taste Great**

Model	Description	Comments
	GRO50-ALK All the benefits of the original Alkalizer combined with the newest "Green" water saving membrane technology on the market. Gallon wasted for one gallon produced vs standard RO which is 4 to 1.	This RO is for the customer that doesn't mind spending a little more to help the environment.
	RO5-ALK The original Alkalizer, 5-Stage RO System with a 50 gpd membrane, made with the highest quality components	A great system that will work for most households small or large.
	ALK-2512 Larger filters offer more minerals with all the same great benefits.	Alkalizer Plus is for people that want that extra mineral boost or just drink lots and lots of water.
