- Your water using appliances will last longer.
- Digital display.
- Low electrical use.
- Metered control makes unit more efficient.

Made in USA

Tap
Water

- **GAC Filter** removes all the chlorine that makes the water smell.
- 1 cubic foot of this carbon has the ability to remove 1 part per million of chlorine from a million gallons of water. This will prolong the life of your water softener resin as well.
- Carbon is one of the most porous materials on earth has a filtering surface area of 1,050 square meters per gram (456 grams in a pound - 27 lbs. per cubic foot).
